MERN Full Stack Engineer

Motivated junior full-stack developer with practical experience working at a small startup, contributing to real-world projects using the MERN stack, MySQL, and Docker. Gained hands-on exposure to backend development, RESTful APIs, and basic real-time features with WebSockets. Helped build features for an HR SaaS platform, including attendance tracking, payroll automation, and user role management. Worked closely with mobile developers and improved backend stability through basic performance tuning. Continuously learning and committed to writing cleaner, more maintainable code. Looking to grow in a professional environment that values good practices, mentorship, and long-term development.

TECHNICAL PROFICIENCIES

- Next.js | Node.js | Express.js | NestJS | MERN Stack | JavaScript (ES6+) | Docker | Git | MySQL

AREAS OF EXPERTISE

- Full-Stack (MERN Stack)
- Backend Development & API Design
- Frontend Development (React.js, Next.js)
- Database Management (MySQL)
- Docker & Containerization
- Version Control & Git
- Backend & Frontend Development
- Real-Time Data Handling & WebSockets
- System Troubleshooting & Support
- Code Optimization & Performance Tuning

KEY ACHIEVEMENTS

- Scaled to 180K+ daily requests by offloading DB writes to a Fastify service in Docker.
- Designed and deployed a production-ready system with flexible employee scheduling, automated via cron jobs and email alerts for issue monitoring
- Developed a high-performance data entry solution using React and JavaScript, optimizing large dataset insertion into custom spreadsheets.

PROFESSIONAL EXPERIENCE

Native code iq, remote

Full Stack Developer

OCT 2023 – present

Built and deployed an HR SaaS used by 3 companies and 1,000+ employees, featuring fingerprint attendance, payroll, and real-time tracking. Led backend and infrastructure efforts, scaling to 180K+ daily requests with Docker and PM2.

Selected Accomplishments:

- Developed and deployed an HR SaaS adopted by 3 companies and 1,000+ employees, with fingerprint attendance, payroll automation, and fraud detection.
- Optimized server performance with Docker-based load balancing and PM2, handling 180K+ daily requests in production with high reliability.
- Implemented real-time employee tracking and custom activity reports using WebSockets, enhancing operational visibility and accountability.
- Collaborated with a Flutter developer and deployed the mobile app on Google Play, now used by 1,000+ employees.

Software Engineer Intern

KAL BNYAN-EL MARSOS • REMOTE, CAIRO

Nov 2022 - Nov 2023

Learned full-stack development using the MERN stack, focusing on responsive UIs, RESTful APIs, and database integration through hands-on practice and guided training.

Selected Accomplishments:

- Trained in HTML, CSS, JavaScript, React, Express, and MongoDB.
- Built full-stack web development projects, focusing on responsive and interactive web applications.
- Gained experience in RESTful API design and database integration

EDUCATION

Bachelor in **Business Information Systems (BIS)**, Al-Alsun Higher Institute, Cairo, Egypt

Languages

Arabic | English
